Location
Ruhpolding

 *duration:*
03:30 hours

 *minimum altitude:*
709 meters

 *altitude difference:*
521 descending

Staudigelhütte - bell forge - Thorau almen - Staudigelhütte

The hike can be started at the **parking lot at the Staudigelhütte** . From here, follow the **tarred road along the signs** to "**Glockenschmiede**" (path no. 65). Once this has been passed, the path now becomes a **comfortable, slowly ascending gravel path** , which leads **along a stream in the direction of "Thorau almen"** (path no. 66).

After a while the path turns into an **idyllic and well-trodden mountain path** . On this one stays **on the right side until you come to a climb** . After a **short, very steep stretch** you come back to the **normal route** . The trail continues to the right, over **easy-to-walk rock steps** , to a **promising path fork** . From here, the Thorau almen can already be seen on the left. In a few minutes we have reached our destination, the Alm, and with a bit of luck we will be rewarded with a **view of marmots above the Alm** .
